.05 -02	-20-20
-06-04	-24-24
-08-06	-32-32

Tube Only size

Important fitting crossover information.

TxP *Silent* Call-Outs

(2404 x 04 x 02)

Some manufacturers **do not** call out the 2nd thread on **Tube x Pipe** fittings. You are just expected to know that the pipe is going to be the standard size, in this case *x 02*.

Pressure Connections eliminates this confusion by calling out all of the sizes.

-03, -05, -10, and -14 are tube only sizes, so when you see these sizes you know that they have to be tube threads.
